

Barak Caine, PhD

**Associate Professor of Psychology
Department of Psychiatry
Harvard Medical School**

presents

"Dr. Jekyll and Mr. Hyde: How the Normal Brain becomes the Addicted Brain".

Tuesday January 3th, 2017, 2-3 pm

**Auditoriet, opgang 61A, Psykiatrisk Center København, afd. O,
Rigshospitalet, Henrik Harpestrengs Vej, 2100 København Ø.**

Dr. Caine aims to understand brain mechanisms underlying abnormal behaviors and to discover improved medications for psychiatric disorders. Throughout his career, he has pursued two lines of investigation: pharmacological mechanisms underlying stimulant medications and stimulant abuse, and neural mechanisms underlying stimulant-induced psychosis and antipsychotic therapeutics. Dr. Caine has received numerous awards, including one from William Jefferson Clinton at the White House.
